
TECHNICAL SKILLS

Amazon Web Services (AWS), Next.js, React, MongoDB, Node, TypeScript, RESTful API's

SUMMARY

Results-driven Cloud Developer with expertise in AWS and Azure platforms, holding a Certified Cloud Practitioner credential. Proven leadership abilities in spearheading cloud development projects, ensuring adherence to best practices and driving team success. Adept at designing and implementing scalable, secure, and highly available cloud solutions while optimizing performance and efficiency. Strong communicator and strategic planner, dedicated to exceeding client expectations and achieving business objectives.

PROFESSIONAL EXPERIENCE

Cloud Developer | Hiebing | Madison, WI

February 2024 – Current

Technologies: Amazon Web Services (AWS), Azure, TypeScript, Jest, Next13, React19

- Proficient in cloud development leveraging AWS and Azure platforms, adept at designing and implementing scalable, secure, and highly available cloud solutions.
- Certified Cloud Practitioner with a strong foundation in cloud computing principles, ensuring adherence to best practices and cost-effective solutions in cloud architecture.
- Demonstrated leadership skills in guiding and managing a team of cloud developers, fostering collaboration, and driving project success through effective communication and strategic planning.
- Proven track record of leading cloud development initiatives, from conceptualization to deployment, optimizing performance and efficiency while meeting business objectives and exceeding client expectations.

React Frontend Developer | GCOM Partners | Milwaukee, WI

March 2023 – February 2024

Technologies: Next.js, React, React Hook Forms, Prisma

- Spearheaded the development of a feature-rich frontend application using cutting-edge technologies.
- Single-handedly owned the end-to-end frontend development, conceiving and crafting all visual components, driving the project's user interface from concept to reality.
- Demonstrated leadership and commitment to team growth by coaching and mentoring junior developers in the intricacies of React and functional components, fostering a culture of continuous improvement.
- Exceeded client expectations to such an extent that our contract was extended, reflecting our exceptional commitment to delivering high-quality solutions and outstanding client satisfaction.

EDUCATION

AWS Certified Cloud Practitioner
TECH I.S. | Web Development
University of Wisconsin - Milwaukee | Human Resources
Full Stack Developer Certificate
Programming Foundations: Algorithms Certificate
Programming Foundations: Object-Oriented Design Certificate

2024
Completed 2022
2016-2019

Personal Projects

Full Stack Web Application | MERN - MongoDB, Express, React, Node | MMORPG Resource Website

Technologies: MongoDB, Express.js, React.js, Node.js

- Collaborated with other developers in the gaming community to put together a web application that provides information in a convenient area to speed up player progression.
- Fetching data and hosting it in a convenient and accessible location has increased progression speed by up to 45%. (Numbers compared during speed runs)
- Created as a free resource to support the community, it has received positive feedback and support. With plans to incorporate ideas from other members of the community, there will be more features implemented.

Player Profile MOBA API

Technologies: Next13 Page Router, React, JavaScript

- Using Riot Games' public API, a user searches for a username and the page returns their player profile and details.
- Users are able to search for a player and view their match history, characters (champions) used, and other user details.
- This web application can be used to scout or analyze a player's tendencies or history to study and improve or simply to share with peers.
